Power BI / web_ai
Dashboards & APIs

The **analytics** schema is the authoritative dimensional data warehouse. Stored procedures (SPs) transform staging data into dimension and fact tables. The **web_ai** schema holds Django ORM tables for the web application.

3. Core Entity Relationship Diagram (analytics schema)

Primary join key: `site_id_property_unit_number` — composite surrogate key of format *OnSiteID-PropertyNumber-UnitNumber* used across all fact tables.
Secondary keys: `property_number` / `onsiteid` (property-level joins), `category_id` (finance), `datekey` / `fulldatealternatekey` (time).

FINANCIAL FACTS analytics

FACT **fact_income_statement & fact_budget_statement**

Monthly P&L actuals vs. budget by property and GL category

Column	Type	Key	Description
propertyID	*integer*	**FK→dim_info_property**	Property identifier
month_end_date	*timestamp*	**FK→dimdate**	Month period end date
category_id	*integer*	**FK→dim_income_budget_category**	GL category
category_value	*money*		Dollar amount for that GL category that month

FACT **fact_bi_banner_report**

Capital project budget tracking from Banner accounting system

Column	Type	Key	Description
property_code	*integer*	**FK→dim_info_property**	

project_id / project_name	*varchar*		Capital project identifier
budget / paid_to_date / spend	*money*		Financial tracking columns
approved_spend / unapproved_spend / budget_variance	*money*		Approval pipeline amounts
capital_type	*varchar(50)*		Type of capital expenditure
status	*varchar(50)*		Project status

LEASING ENGAGEMENT & REPUTATION FACTS analytics

FACT fact_knock_activity_feed_stage (daily & weekly)

Leasing agent activity from Knock CRM — contacts, visits, applications, leases

Column	Type	Description
OnesiteID	*integer*	FK → dim_info_property (onsiteid)
StartDate / EndDate	*date*	Reporting period
Leads / Prospects / Visits / Applications / Leases	*integer*	Funnel metrics
Call / Email / Text / Facebook / Bulk_Email	*integer*	Contact channel counts
Followups, ApptsSched, Appts, WalkIn	*integer*	Activity counts
Followups/Prospect, Call/Prospect (ratios)	*integer*	Efficiency metrics

FACT fact_soci_details_snapshot

Online reputation snapshot — aggregate review scores across 11+ platforms

Column	Type	Description
onesiteid	*double precision*	FK → dim_info_property
snapshot_date	*date*	Date of the snapshot
average_review_rating	*double precision*	Overall cross-platform average
google_business_profile_average_rating	*double precision*	Google rating

yelp_average_rating	*double precision*	Yelp rating
[platform]_positive/neutral/negative_reviews	*double precision*	Review sentiment breakdown per platform
[platform]_number_of_unresponded_reviews	*double precision*	Unanswered reviews
Platforms covered	—	Google, Yelp, Facebook, Apartments.com, ApartmentGuide, Rent.com, Hotpads, Citysearch, TripAdvisor, ModernMessage, ApartmentRatings

FACT fact_ellis_kpi_feed_stage_weekly / _monthly

Resident satisfaction KPI scores from Ellis survey system

Column	Type	Description
onesiteid	*integer*	FK → dim_info_property
weekstartdate / weekenddate (or monthyear)	*date / int*	Period identifier
loyalty_score	*integer*	Overall loyalty / NPS-style score
customer_service	*integer*	Customer service KPI score
maintenance_satisfaction	*integer*	Maintenance team score
community_sentiment	*integer*	Community feel score
perceived_value	*integer*	Rent-to-value perception
property_satisfaction	*integer*	Overall property satisfaction
renewal_decision	*integer*	Likelihood to renew score

KPI SUMMARY / AGGREGATED ANALYTIC TABLES analytics

KPI olympus_lease_trend_analysis

Daily property-level lease and occupancy KPIs — primary dashboard source

Column	Type	Description
property_number	*integer*	FK → dim_info_property
date	*date*	Snapshot date (PK with property_number)

total_units	*integer*	Total rentable units on that date
occupied_units	*integer*	Occupied unit count
percentage_occupacy	*double precision*	Occupancy % (occupied / total)
total_move_ins / total_move_outs	*integer*	Daily move activity counts
effective_rent / market_rent	*double precision*	Average effective vs. market rent
avg_amount_per_sqft	*double precision*	Average rent per square foot
visit / applications / cancelled / denied	*integer*	Leasing funnel metrics
NTV / MTM / make_ready / down	*integer*	Unit status counts
vacant_pre_leased / occupied_pre_leased	*integer*	Preleasing pipeline
current_month_expiring / next_month_expiring / month_after_next_expiring	*integer*	Lease expiration pipeline (90-day view)
tbd_90_days	*integer*	Undecided renewals in 90-day window

KPI olympus_lease_kpis_trend_monthly

Monthly KPI rollup — operations, financials, renewals, turns

Column	Type	Description
property_number	*integer*	FK → dim_info_property
EndDateOfMonth / kpi_month	*date / varchar*	Period
exposure	*double precision*	Vacancy exposure %
delinquency	*double precision*	Delinquency %
average_turn_time	*double precision*	Avg days to turn a unit
service_request	*integer*	Open service request count
renewel_conversion / expirations / renewed	*double/int*	Renewal metrics
d0_30 / d30_60 / d60_90	*double precision*	Delinquency aging buckets
rent_cur / rent_prev / rent_prev_last	*double precision*	3-month rent trend

7. staging Schema — ETL Landing Tables

All staging tables are **truncated and reloaded daily** by the Prefect ETL pipeline. They use raw text/varchar columns (no type enforcement). They serve as temporary landing zones before stored procedures transform data into the analytics schema.

STAGING TABLES staging — 47 tables

#	Table Name	Source System	Target Fact/Di
1	`all_units_stage`	Ellis PMS	fact_lease_all_u

8. web_ai Schema — Application Layer

Django ORM tables backing the Olympus web application and AI-powered analytics endpoints. Key tables mirror analytics KPI tables for API consumption.

WEB APP TABLES web_ai

Table	Purpose	Notes

`olympus_lease_trend_analysis`	Daily KPI mirror	Copy of analytics.olympus_lease_trend_a web API
`olympus_lease_kpis_trend_monthly`	Monthly KPI mirror	Copy of analytics.olympus_lease_kpis_tre
`olympus_lease_moveout_reasons_trend_monthly`	Move-out analytics	Monthly move-out reason categ
`income_statement_actual`	P&L actuals	Income statement data for web
`income_statement_summary`	P&L summary	Aggregated income summary
`budget_line_item`	Budget details	Line-item budget data for web U
`property_master`	Property reference	Lightweight property list for web
`renewal_tracking_override`	Manual overrides	Analyst manual renewal decision
`critical_incident`	Incident tracking	Property-level critical incident lo
`auth_user / auth_group`	Django auth	Standard Django authentication
`django_admin_log`	Admin audit	Admin action audit log
`django_migrations`	Schema versioning	Migration history

9. etl_alerts Schema — Pipeline Monitoring

ALERT TABLES etl_alerts

ALERT **lease_trade_out_alert** Data quality alerts for lease trade-out report anomalies

Column	Type	Description
report_name	*varchar(50)*	Report that triggered the alert
site_id_property_unit_number	*varchar(50)*	Unit that has the data issue
property_name	*varchar(100)*	
current_lease_lease_start	*varchar(20)*	Problematic lease start value
logdate	*timestamp*	When the alert was logged

10. Key Identifier Glossary

Identifier	Type	Format / Example	Used In
`site_id_property_unit_number`	varchar(50)	"12345-101-1A"	All unit-level fact tables, dim_unit
`onsiteid`	integer	12345	dim_info_property, dim_unit, SOCI, Knock, Ellis facts
`property_number`	integer	101	dim_info_property, fact_weekly_report, KPI tables
`entity_id`	integer	346	dim_info_property (PK)

`lease_id`	integer	78901	fact_lease (PK)
`resident_id`	integer	55432	dim_resident_demographics (PK)
`resident_member_id`	integer	99123	dim_contact_level_details (PK)
`category_id`	integer	42	dim_income_budget_category (PK), fact_income_statement, fact_budget_statement
`datekey`	integer	20260314	dimdate (PK)
`fulldatealternatekey`	date	2026-03-14	dimdate
